To update you on the plans for the week of the 28th, we will need to send the organics to CLP in order to keep them together for this large an event. For the inorganics, the Regional lab can perform these if given a 45 day turn. Since there is not a separate data review period for the Regional lab, this should put delivery in line with the final CLP data (21 day lab + 28 day data review = 49 days). If there are any concerns with the approach, let me know. Thanks. - Nardina
